

## Background

- ▶ Training + accreditation (T/A) of pharmacy technician (PT) in antineoplastic preparation = securing distribution
- ▶ T/A recommendations = not very detailed, lack of practical methods and suggested tools
- needs to identify the most appropriate educational tools and methods for T/A

### Objective

Realisation of educational tools inventory's used in French healthcare facility for T/A of PT working in chemotherapy preparations unit's (CPUs)

## Materials and Methods

### Literature review via databases:

- ▶ Medline
- ▶ Cochrane
- ▶ Google scholar
- ▶ Thesis / dissertation
- ▶ Francophone pharmaceutical congresses

From January 2014

To January 2020

To define

Educational tools

Tools combination

Training stages

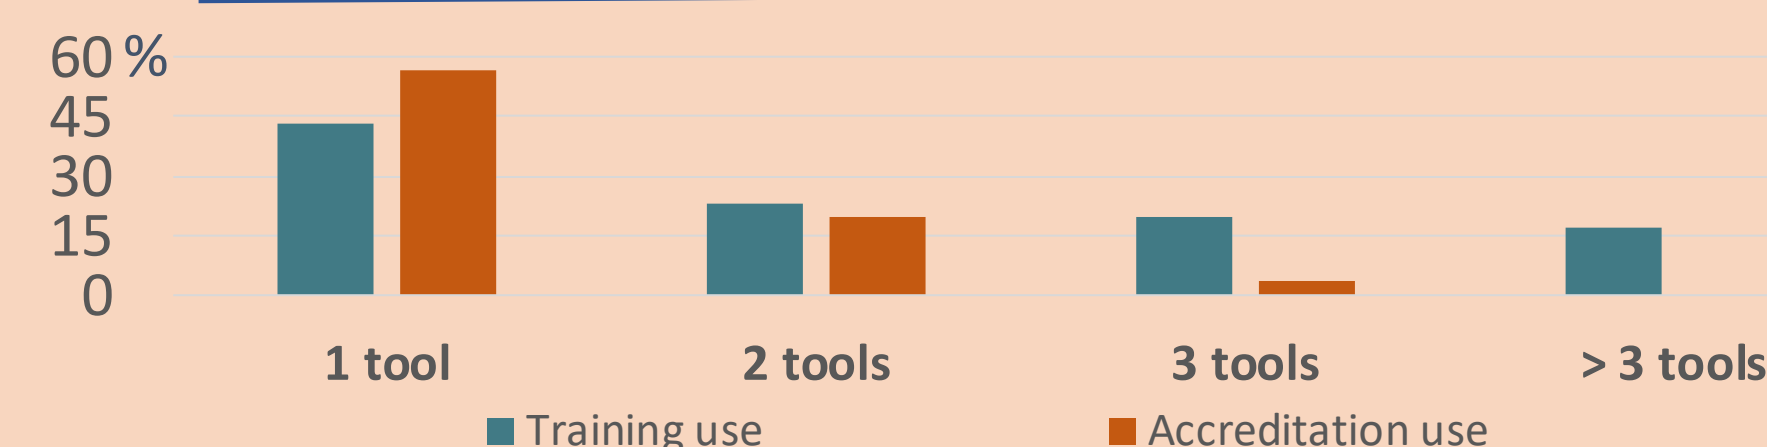

Evaluation methods

## Results

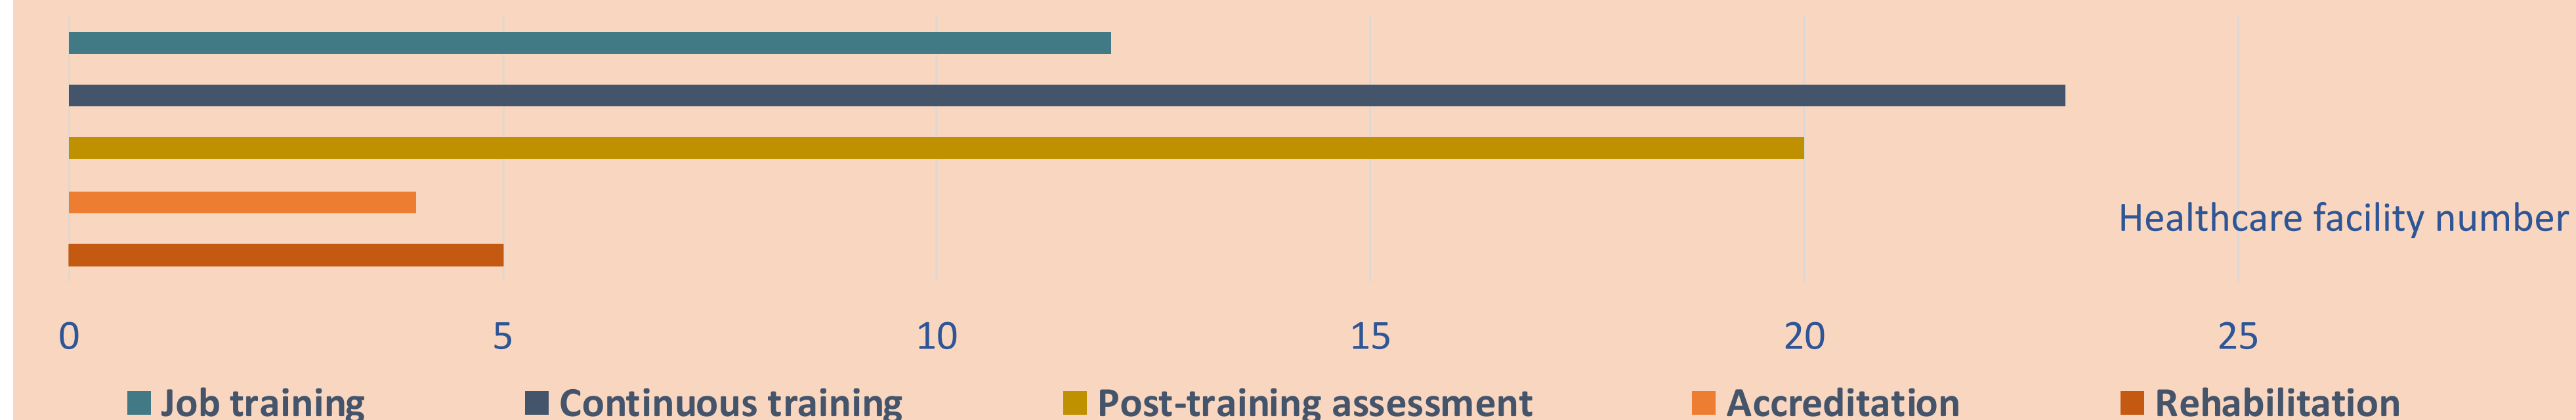

### Selected literature

- 39** publications included and resulting from
- 30** frenches healthcare facility
- 11** differents tools identified

### Tools combination's

### Training stages for which identified educational tools are used

### Educational tools identified for training and accreditation

### Assessment, accreditation and rehabilitation methods

#### Assessment and accreditation methods

**Assessment** described by **20 HS**

**Accreditation** described by **4 HS**

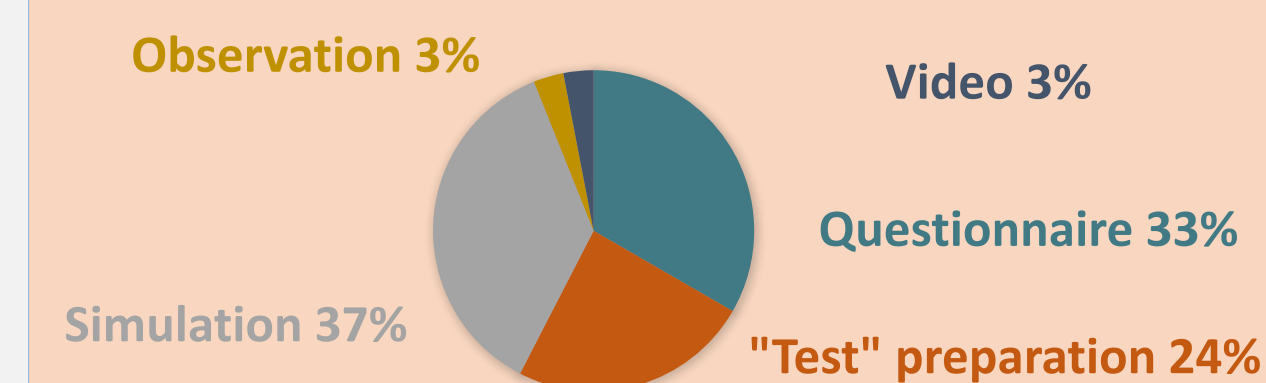

**Certificate** described by **1 HS**

#### Rehabilitation methods

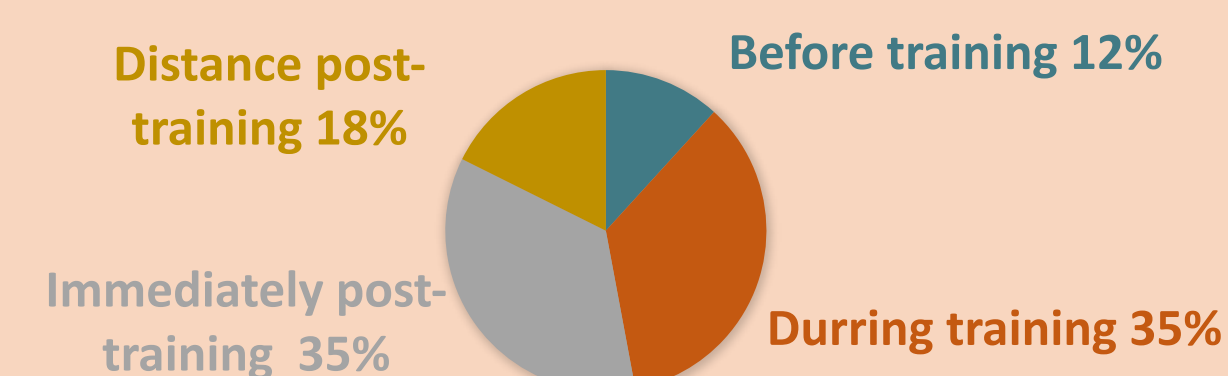

**Rehabilitation** described by **5** Healthcare structure (HS)

- ▶ Annually
- ▶ After prolonged stoppage of activity

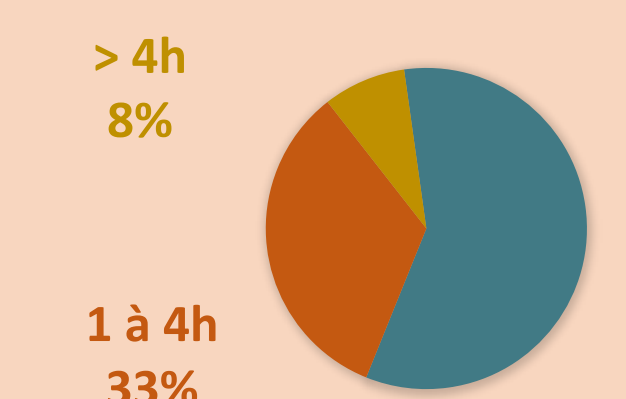

#### TOOLS

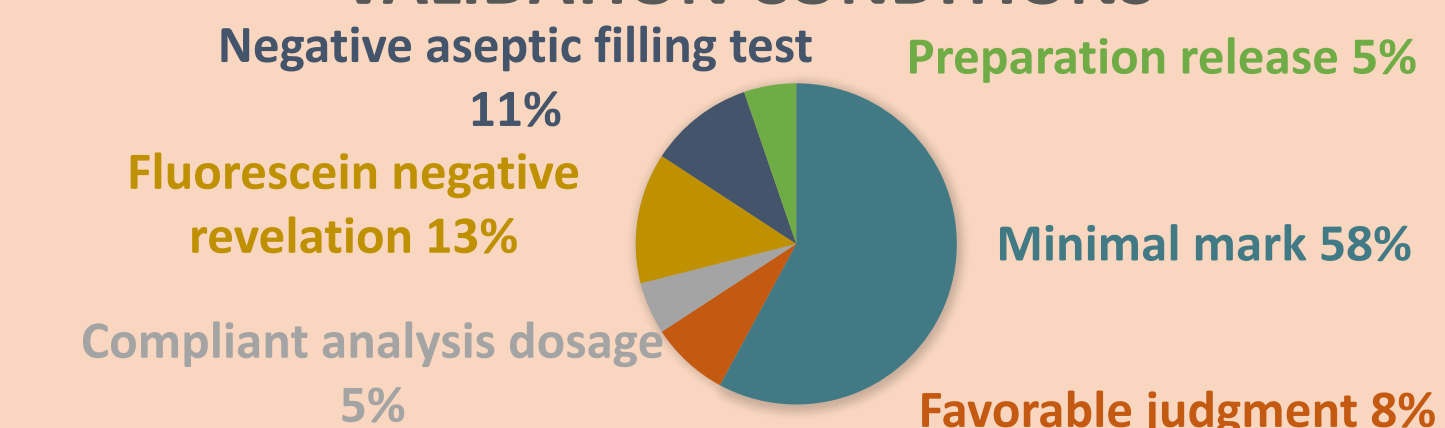

#### MOMENTS

#### DURATIONS

#### VALIDATION CONDITIONS

## Discussion / Conclusion

- ▶ **Many tools** for pharmacy technician T/A are described in France
- ▶ Their **articulation** within **continuous training model** is hardly described
- ▶ Few healthcare facility described the educational tools application's in accreditation and rehabilitation
- National needs assessment would make it possible to refine educational tools use in order to tend towards a **training and accreditation standardization**
