

Isolator Renewal: Don't forget anything!

Clémence Jutard, Clément Carbasse, Emmanuel Coget, Melinda Rigoni, Agnes Roche, Marie-Laure Ducassou, Christelle Cousin, Pascale Brouard
Chemotherapy Compounding Unit, Department of Pharmacy, Nîmes University Hospital, Nîmes, France

Context

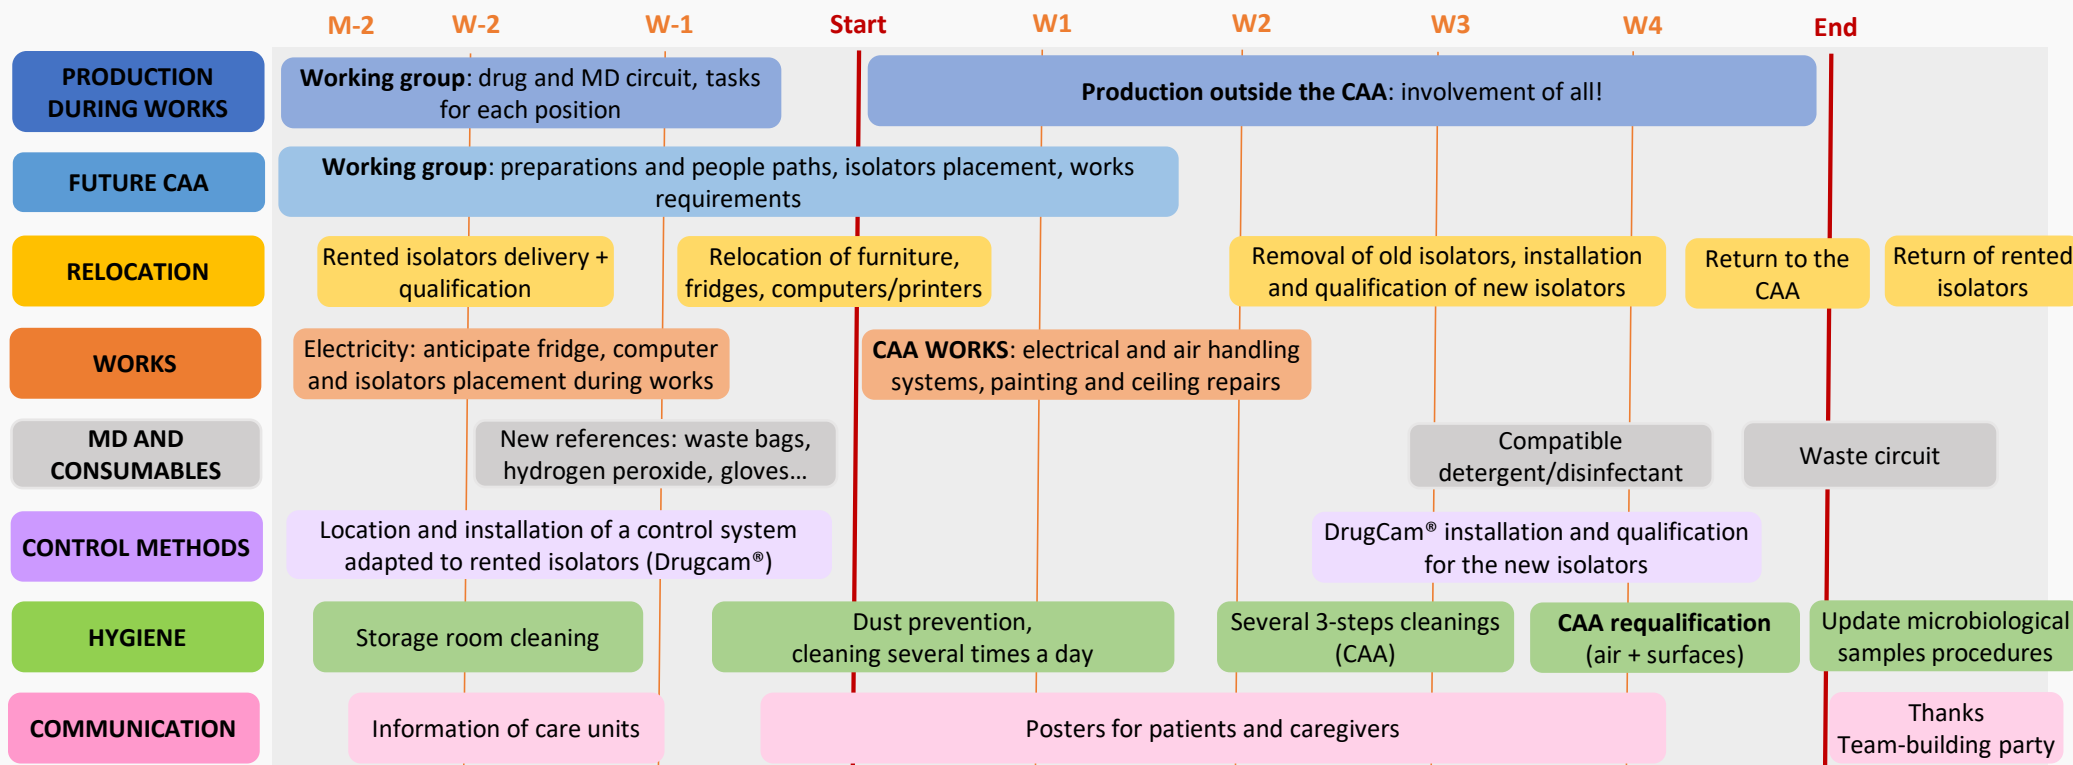

- **Replacement of the isolators** in our chemotherapy compounding unit (33,000 preparations a year)
- **Works for 5 weeks** (condemned CAA)
- **Maintaining production** : we rented isolators placed in a storage room

Objective

- **Feedback**
- **Management tool for such a project**

Materials and Methods

- Creation of a **Gantt chart**
⇒ **Chronological representation** of the project stages
- **Main topics** were divided into **subtasks**

1 Coordination

logistic
drugcam
isolators
refrigeration engineer
works
service providers
purchase IT

Conclusion

Anticipation +++
Team involvement +++
Allow time to manage unexpected events

SUCCESS !

Calm project management
Maintaining patient safety

2 Anticipation

- Update **hygiene procedures**
- Update **microbiological samples** (for rented and new isolators)
- Choice of a new compatible detergent/disinfectant
- Anticipate the intervention of **requalification** service providers (flexible date)

3 Tips

- **Upstream multidisciplinary working groups**
- Relocation of Mab standardised doses production in the non-cytotoxic preparation unit
- Anticipate the organisation of **overtime** if necessary
- Designate **project referents** (devoted time)
